Dashboard Functionality

Dashboard Feature	Your Request
Reference dashboard (Should this dashboard be modeled on an existing dashboard? If so, provide a link and describe the similarity.)	Build a new centralized dashboard showing store performance, overall sales, and profitability. It will provide insights into customer demographics and identify top-performing products and categories
Access (How should access to the dashboard be limited? Who needs to have access?)	Access will be provided as read-only based on stakeholder roles (Executive, Marketing, and Regional Store Managers). Granular customer contact details are excluded.

Scope (What data should be included or excluded in this dashboard?)	Fields include customer id, city, date of birth, gender, Date of join. All other tables data will be accessible based on stakeholder's role.
Date filters and granularity (Should the dashboard include date filters? If so, what time frame should be displayed by default? Should the dashboard include a "granularity" drop-down? If so, what granularity should be selected by default?)	Data filter can be applied for the following: Date, Store, Product Category, and Demographics Granularity: Any chart with user detail metrics should have the ability to click on that metric to view specific information.
